LAURINI OFFICINE MECCANICHE SRL

Loc Spigarolo

43011 BUSSETO (PR) - ITALY

SAINT-MEDARD D'EYRANS, le 11 mars 2016

The attention of Mr Paolo GARBI

Dear Mr GARBI,

Knowing Laurini's equipment for a long time, we have chosen the multipurpose tractor "Muletrax 3000" in several challenging projects.

Its main characteristic is the possibility to be modified in a short time, so that with the same tractor many operations can be made: from pipe stringing or welding to refuelling and material transportation.

Our operators have always had a good opinion regarding this machine, considering it easy to drive and comfortable.

We find necessary to have almost one MULETRAX on the jobsite.

Best regards,

Antoine ROUMAIN DE LA TOUCHE,
Service Matériel
