

To Whom It May Concern

At SPIECAPAG, we have used Laurini's Muletrax 3000 for very challenging projects all over the world and especially in remote areas.

Thanks to its high performance and reliability, Muletrax has always perfectly fulfilled its Pay Welder role.

The cab is designed for comfort and optimized production throughout the shift, whatever the prevailing weather conditions.

Last but not least, Muletrax 3000 can be easily transformed into a pipe carrier, sandblasting tractor or tank transporter, which makes it a really "Multipurpose" tractor.

For all these reasons, we strongly recommend Laurini's Muletrax 3000.
