Riferimenti da citare nella risposta

Prot. n.

Parma (Italy), 05 May 2016

*To whom it may concern,*

*We hereby confirm we used and we are still using the "Vulcano 2.0" for our pipeline Projects such as Win Gas in Germany, Tap in Greece, Trans Canada in Mexico, Sassol in Mozambique, Sonatrach in Algeria.*

*Laurini Vulcano2.0 successfully dealt with all difficulties occurred during the projects execution, showing its high performances preparing the bedding and covering the pipe in different conditions and environments (big diameter, wide ditch, wet conditions, low percentage of fine material).*

*Laurini Vulcano2.0 functionalities enable the complete covering of the trench in just one pass. Moreover "Vulcano2.0" does not require a highly skilled operator so its monthly rate together with the excavator's rate is normally less expensive than a self-loading padding machine itself.*

*Nowadays Bonatti owns 16 units working in several challenging projects, characterized by different kind of ground and hard environmental conditions. From European countries, like Germany and Greece, to remote areas of Algeria, Mozambique and Mexico, Laurini's Vulcano always met our expectations.*

*We therefore recommend Laurini "Vulcano2.0" for as a reliable and effective solution for Pipelines Projects.*

*Sincerely,*

*Giuliano Gelmi  
Responsabile Gestione Mezzi / Asset Manager*
